Gross Margin Increased 22.4% to \$131.7 Million

Net Income of \$5.8 Million, or \$0.04 per Diluted Share

Adjusted Net Income per Diluted Share of \$0.08

Adjusted EBITDA Increased 46.7% to \$43.7 Million

ATLANTA, May 25, 2021 (GLOBE NEWSWIRE) -- Aveanna Healthcare Holdings, Inc. (NASDAQ: AVAH), a leading, diversified home care platform focused on providing care to medically complex, high-cost patient populations, today announced financial results for the first quarter ended April 3, 2021.

Tony Strange, Chief Executive Officer commented "We are excited to share our first quarter results following our recent initial public offering. We are very proud of the results that we delivered for the quarter and remain optimistic about our ability to continue to perform. With a strong balance sheet and positive outlook on both Medicaid and Medicare reimbursement, we believe that we are well positioned to continue to execute our growth initiatives and pursue value creation opportunities for all of our stakeholders."

Revenue was \$417.2 million for the first quarter of 2021, as compared to \$355.2 million for the first quarter of 2020, an increase of \$61.9 million, or 17.4%. This increase was driven by growth across our key segments, including:

- a \$30.3 million, or 9.5%, increase in Private Duty Services ("PDS") revenue to \$350.8 million;
- a \$27.0 million, or 604.0%, increase in Home Health & Hospice ("HHH") revenue to \$31.5 million; and
- a \$4.6 million, or 15.2%, increase in Medical Solutions ("MS") revenue to \$34.8 million.

Gross margin was \$131.7 million, or 31.6% of revenue, for the first quarter of 2021, as compared to \$107.5 million, or 30.3% of revenue, for the first quarter of 2020, an increase of \$24.1 million, or 22.4%.

Net income was \$5.8 million for the first quarter of 2021, as compared to \$37.6 million for the first quarter of 2020, while net income per diluted share was \$0.04 for the first quarter of 2021, compared with \$0.27 for the first quarter of 2020. Adjusted net income per diluted share was \$0.08 for the first quarter of 2021 as compared to \$0.02 for the first quarter of 2020.

Adjusted EBITDA was \$43.7 million, or 10.5% of revenue, for the first quarter of 2021 as compared to \$29.8 million, or 8.4% of revenue, for the first quarter of 2020, an increase of \$13.9 million, or 46.7%.

Recent Developments

Aveanna's Initial Public Offering ("IPO")

- On April 28, 2021, we priced our IPO at an offering price to the public of \$12.00 per share and closed the transaction on May 3, 2021. We sold 38.2 million shares of our common stock in the IPO, resulting in total net proceeds of \$432.4 million after deducting underwriters' discounts and commissions.
- On May 21, 2021, the underwriters exercised their overallotment option to acquire an additional 4.0 million shares of our

common stock, which, net of underwriters' discounts and commissions, resulted in additional proceeds of \$45.2 million to Aveanna. This transaction closed on May 25, 2021.

- We used the net proceeds from our IPO to repay \$100.0 million principal amount of our first lien indebtedness and \$307.0 million of our second lien indebtedness, including accrued interest. We then terminated our second lien credit facility. We also used proceeds from our IPO to pay offering costs of approximately \$6.8 million, with the remaining proceeds to be used for general corporate purposes and future acquisitions.
- Following our IPO, we received ratings upgrades from Moody's to B2 (stable outlook) and Standard and Poor's to B- (positive outlook).
- Following our IPO, we increased the total capacity under our senior revolving credit facility from \$75.0 million to \$200.0 million. As of April 3, 2021, we had cash of \$67.1 million and bank debt of \$1,202.3 million, with \$55.2 million of available borrowing capacity under our revolving credit facility. After the repayment of debt with proceeds from our IPO, our bank debt as of April 3, 2021 on a proforma basis was \$862.3 million.

David Afshar, Chief Financial Officer commented "We entered 2021 from a position of strength, with first quarter earnings that exceeded our expectations. Additionally, we are pleased to have returned \$29.4 million of Provider Relief and Stimulus Funds received during 2020 to the respective government agencies in the first quarter of 2021. The overall proceeds we received from our IPO and the debt we retired as a result has reduced our leverage and related debt service costs. With our improved capital structure as well as recent positive ratings agency actions, we believe we are even better positioned to capitalize on market opportunities before us."

M&A Update

- On April 16, 2021, we completed the acquisition of Doctor's Choice Holdings, LLC ("Doctor's Choice"), a home health business with sixteen branches throughout the state of Florida, expanding our presence in the adult home health business and creating further density for us in the state of Florida.
- We have an active pipeline with numerous HHH and PDS opportunities.

Rod Windley, Executive Chairman, commented "We are excited about our most recent acquisition, Doctor's Choice, which further demonstrates our commitment to grow through M&A. We believe that Doctor's Choice is a perfect fit to our strategy because it deepens our penetration into the traditional home health market and brings us greater density in the state of Florida. Our pipeline of acquisition targets currently remains robust for traditional home health as well as private duty services."

Full Year 2021 Guidance

- Revenue is anticipated to be at least \$1,745 million.

The Company is not providing guidance on net income at this time due to the volatility of certain required inputs that are not available without unreasonable efforts, including future fair value adjustments associated with our interest rate swaps, costs related to the extinguishment of debt, and stock compensation expenses associated with the performance component of our stock options.

- Adjusted EBITDA is anticipated to be at least \$185 million.

Non-GAAP Financial Measures

In addition to our results of operations prepared in accordance with U.S generally accepted accounting principles ("GAAP"), we also evaluate our financial performance using EBITDA, Adjusted EBITDA, Field contribution, Field contribution margin, Adjusted corporate expense, Adjusted net income and Adjusted net income per diluted share. Given our determination of adjustments in arriving at our computations, these non-GAAP measures have limitations as analytical tools and should not be considered in isolation or as substitutes or alternatives to net income or loss, revenue, operating income or loss, cash flows from operating activities, total indebtedness or any other financial measures calculated in accordance with GAAP.

EBITDA and Adjusted EBITDA

EBITDA and Adjusted EBITDA are non-GAAP financial measures and are not intended to replace financial performance measures determined in accordance with GAAP, such as net income (loss). Rather, we present EBITDA and Adjusted EBITDA as supplemental measures of our performance. We define EBITDA as net income (loss) before interest expense, net; income tax (expense) benefit; and depreciation and amortization. We define Adjusted EBITDA as EBITDA, adjusted for the impact of certain other items that are either non-recurring, infrequent, non-cash, unusual, or items deemed by us to not be indicative of the performance of our core operations, including impairments of goodwill, intangible assets, and other long-lived assets; non-cash, share-based compensation; sponsor fees; loss on extinguishment of debt; fees related to debt modifications; the effect of interest rate derivatives; acquisition-related and integration costs; legal costs and settlements associated with acquisition matters; the discontinuation of our ABA Therapy services; non-acquisition related legal settlements; and other system transition costs, professional fees and other costs. As non-GAAP financial measures, our computations of EBITDA and Adjusted EBITDA may vary from similarly termed non-GAAP financial measures used by other companies, making comparisons with other companies on the basis of this measure impracticable.

We believe our computations of EBITDA and Adjusted EBITDA are helpful in highlighting trends in our core operating performance. In determining which adjustments are made to arrive at EBITDA and Adjusted EBITDA, we consider both (1) certain non-recurring, infrequent, non-cash or unusual items, which can vary significantly from year to year, as well as (2) certain other items that may be recurring, frequent, or settled in cash but which we do not believe are indicative of our core operating performance. We use EBITDA and Adjusted EBITDA to assess operating performance and make business decisions.

We incurred substantial acquisition-related costs and integration costs in fiscal years 2021 and 2020. The underlying acquisition activities took place over a defined timeframe, had distinct project timelines and were incremental to activities and costs that arose in the ordinary course of our business.

Therefore, we believe it is important to exclude these costs from our Adjusted EBITDA because it provides us a normalized view of our core, ongoing operations after integrating our acquired companies, which we believe is an important measure in assessing our performance.

Field contribution and Field contribution margin

Field contribution and Field contribution margin are non-GAAP financial measures and are not intended to replace financial performance measures determined in accordance with GAAP, such as operating income (loss). Rather, we present Field contribution and Field contribution margin as supplemental measures of our performance. We define Field contribution as operating income (loss) prior to corporate expenses and other non-field related costs, including depreciation and amortization, acquisition-related costs, and other operating expenses. Field contribution margin is Field contribution as a percentage of revenue. As non-GAAP financial measures, our computations of Field contribution and Field contribution margin may vary from similarly termed non-GAAP financial measures used by other companies, making comparisons with other companies on the basis of these measures impracticable.

We believe Field contribution and Field contribution margin are helpful in highlighting trends in our core operating performance and evaluating trends in our branch and regional results, which can vary from year to year. We use Field contribution and Field contribution margin to make business decisions and assess the operating performance and results delivered by our core field operations, prior to corporate and other costs not directly related to our field operations. These metrics are also important because they guide us in determining whether our branch and regional administrative expenses are appropriately sized to support our caregivers and direct patient care operations. Additionally, Field contribution and Field contribution margin determine how effective we are in managing our field supervisory and administrative costs associated with supporting our provision of services and sale of products.

Adjusted corporate expenses

Adjusted corporate expenses is a non-GAAP financial measure and is not intended to replace financial performance measures determined in accordance with GAAP, such as corporate expenses. Rather, we present adjusted corporate expenses as a supplemental measure of our performance. We define Adjusted corporate expenses as corporate expenses adjusted for the impact of certain other items that are either non-recurring, infrequent, non-cash, unusual, or items deemed by us to not be indicative of the performance of our core operations, including non-cash, share-based compensation; sponsor fees; acquisition-related and integration costs; legal costs and settlements associated with acquisition matters; COVID related costs, net of reimbursement; and other system transition costs, professional fees and other costs. As non-GAAP financial measures, our computations of adjusted corporate expenses may vary from similarly termed non-GAAP financial measures used by other companies, making comparisons with other companies on the basis of this measure impracticable.

We believe Adjusted corporate expenses is helpful in highlighting trends in our corporate support function, which can vary from year to year. We use Adjusted corporate expenses to make business decisions in determining whether or not our corporate expenses is appropriately sized to support our caregivers and direct patient care operations. Excluding the aforementioned items from corporate expenses that are either non-recurring, infrequent, non-cash, unusual, or items deemed by us to not be indicative of the performance of our core operations allows us to evaluate adjusted corporate expenses in relation to the support necessary for our caregivers and direct patient care operations.

Adjusted net income and Adjusted net income per diluted share

Adjusted net income represents net income as adjusted for the impact of GAAP income tax, goodwill, intangible and other long-lived asset impairment charges, non-cash share-based compensation expense, sponsor fees, loss on extinguishment of debt, interest rate derivatives, acquisition-related costs, integration costs, legal costs, COVID-related costs net of reimbursement, ABA exited operations, other system transition costs, professional fees and certain other miscellaneous items on a pre-tax basis. Adjusted net income includes a provision for income taxes derived utilizing a combined statutory tax rate. The combined statutory tax rate is our estimate of our long-term tax rate. The most comparable GAAP measure is net income.

Adjusted net income per diluted share represents adjusted net income on a per diluted share basis using the weighted-average number of diluted shares outstanding for the period. The most comparable GAAP measure is net income per share, diluted.

Adjusted net income and Adjusted net income per diluted share are important to us because they allow us to assess financial results, exclusive of the items mentioned above that are not operational in nature or comparable to those of our competitors.
